SEO Assessment

Section A

1. What is SEO? Explain On-Page and Off-Page SEO.

SEO (Search Engine Optimization) is the process of improving a website so that it appears higher in organic (non-paid) search results and attracts more relevant traffic.

Type	Meaning	Examples
On-Page SEO	Optimizing elements on your own website to help search engines understand and rank the content.	Keyword optimization, title tags, meta descriptions, headings, internal links, page speed, quality content.
Off-Page SEO	Activities outside your website that build trust, authority, and visibility.	Backlinks from other websites, brand mentions, social sharing, guest posting.

Example: For a Mitticool product page, On-Page SEO would include using keywords such as "clay water bottle" in the title and product description; Off-Page SEO would include getting links from sustainable-living blogs.

2. Define keywords. Difference between short-tail & long-tail keywords.

Keywords are the words or phrases users type into search engines when looking for information, products, or services. Websites use relevant keywords in content to match user search intent.

Keyword type	Definition	Example	Search volume	Competition
Short-tail keyword	A broad keyword, usually 1–2 words.	“water bottle”	High	High
Long-tail keyword	A more specific phrase, usually 3 or more words.	“best clay water bottle for summer in India”	Lower	Lower

Long-tail keywords usually bring fewer visits but more targeted visitors because they match a clearer user need.

3. What is Crawling, Indexing & Ranking?

- **Crawling:** Search-engine bots, also called crawlers or spiders, scan web pages and follow links to discover new or updated content.
- **Indexing:** The search engine analyzes and stores crawled pages in its database, called the index. Only indexed pages can appear in search results.
- **Ranking:** For a user’s query, the search engine orders indexed pages by relevance, quality, and user experience; the best-matching pages appear higher.

Simple flow: Crawl → Index → Rank.

4. What is a SERP? Mention any 3 SERP features.

SERP (Search Engine Results Page) is the page displayed by a search engine after a user enters a query. It may include organic results, ads, and additional features.

Three SERP features are:

- **Featured snippets:** A short answer shown at the top of results.
- **People Also Ask:** Related questions and expandable answers.

- **Local pack/map results:** Nearby business listings shown with a map, often for searches such as “clay products near me.”

Other common features include image results, video results, shopping results, and paid ads.

5. What is domain authority?

Domain Authority (DA) is a Moz metric that predicts how likely an entire website is to rank in search results compared with competitors. It ranges from **1 to 100**, where a higher score generally indicates stronger ranking potential.

DA is mainly influenced by a website’s backlink profile and overall link strength. Importantly, it is **not a direct Google ranking factor**; it is a comparative SEO metric used to assess and benchmark websites.

Task 2: On-Page SEO

Keyword Research — Bakery

Selected business: Bakery
Assumed target location: India (local/national SEO)
Tools to verify final figures: Ubersuggest, Google Keyword Planner, or OnlySocial.io. Search volume and keyword difficulty (KD) differ by tool, country, and date, so the figures below are practical estimates for an assignment; re-check them in your chosen tool before submission.

Primary Keywords

No.	Primary Keyword	Est. Monthly Search Volume	Est. Keyword Difficulty	Search Intent
1	bakery	5,000,000+ global	Very High (80+)	Informational/Local

No.	Primary Keyword	Est. Monthly Search Volume	Est. Keyword Difficulty	Search Intent
2	bakery near me	2,262,500 global	High	Local/Transactional
3	cake shop	High	High (60–75)	Local/Transactional
4	birthday cake	High	High (60–80)	Transactional
5	custom cakes	30,000–50,000	Medium (40–60)	Transactional
6	wedding cake	High	High (60–80)	Transactional
7	cupcakes	High	High (60–80)	Transactional
8	fresh bread	Medium	Medium (40–55)	Transactional
9	pastry shop	Medium	Medium (40–60)	Local/Transactional
10	online cake delivery	High	High (70+)	Transactional

Broad bakery terms have very high search demand but also strong competition; “bakery near me” alone shows about 2.26 million global monthly searches in one keyword dataset. “Custom cakes” is commonly reported in the 30,000–50,000 monthly-search range with medium competition.

Long-Tail Keywords

No.	Long-Tail Keyword	Est. Monthly Search Volume	Est. Keyword Difficulty	Search Intent
1	best bakery near me for birthday cakes	500–1,500	Low–Medium (20–40)	Local/Transactional
2	order custom cake online same day delivery	5,000–15,000	Medium (40–60)	Transactional
3	eggless birthday cake near me	500–2,000	Low–Medium (20–45)	Local/Transactional
4	gluten-free bakery near me	103,000 global	Medium (40–60)	Local/Transactional
5	vegan cupcakes near me	Medium	Medium (35–55)	Local/Transactional
6	healthy dessert options for kids' birthday party	2,000–10,000	Low (15–35)	Informational/Commercial
7	best sourdough bread bakery near me	500–1,500	Low–Medium (20–40)	Local/Transactional
8	wedding cake designer near me	500–2,000	Medium (35–55)	Local/Transactional
9	sugar-free cakes for diabetics near me	300–1,000	Low (15–35)	Local/Transactional

No.	Long-Tail Keyword	Est. Monthly Search Volume	Est. Keyword Difficulty	Search Intent
10	homemade cinnamon rolls near me	480 global	Medium (35–50)	Local/Transactional

Long-tail keywords are longer, more specific searches; they usually have lower individual volume but higher conversion potential and lower competition than broad terms. Examples such as “order custom cake online same day delivery” and “healthy dessert options for kids’ birthday party” are specifically identified as lower-competition bakery long-tail opportunities.

Suggested Keyword Strategy

- Use **primary keywords** on main service pages: Home, Cakes, Bread, Pastries, Online Ordering, Contact/Location.
- Use **long-tail keywords** in blog posts, product descriptions, FAQs, and location pages.
- For a local bakery, prioritize “near me”, city-name, and delivery-related keywords because they indicate strong purchase intent.
- Target easier long-tail terms first, then build authority to compete for broader keywords such as “bakery” and “cake shop.” Keywords with difficulty scores of 1–30 are generally easier, 30–60 moderate, and 60–100 difficult.

Task 2:

Task 3: Technical SEO Checklist

Technical SEO Checklist — Apple Website

Website checked: https://www.apple.com/

Audit tool: SEOmator

Report date: 19 October 2026

Below is an assignment-ready **checklist** based on your uploaded report, with a separate sitemap check.

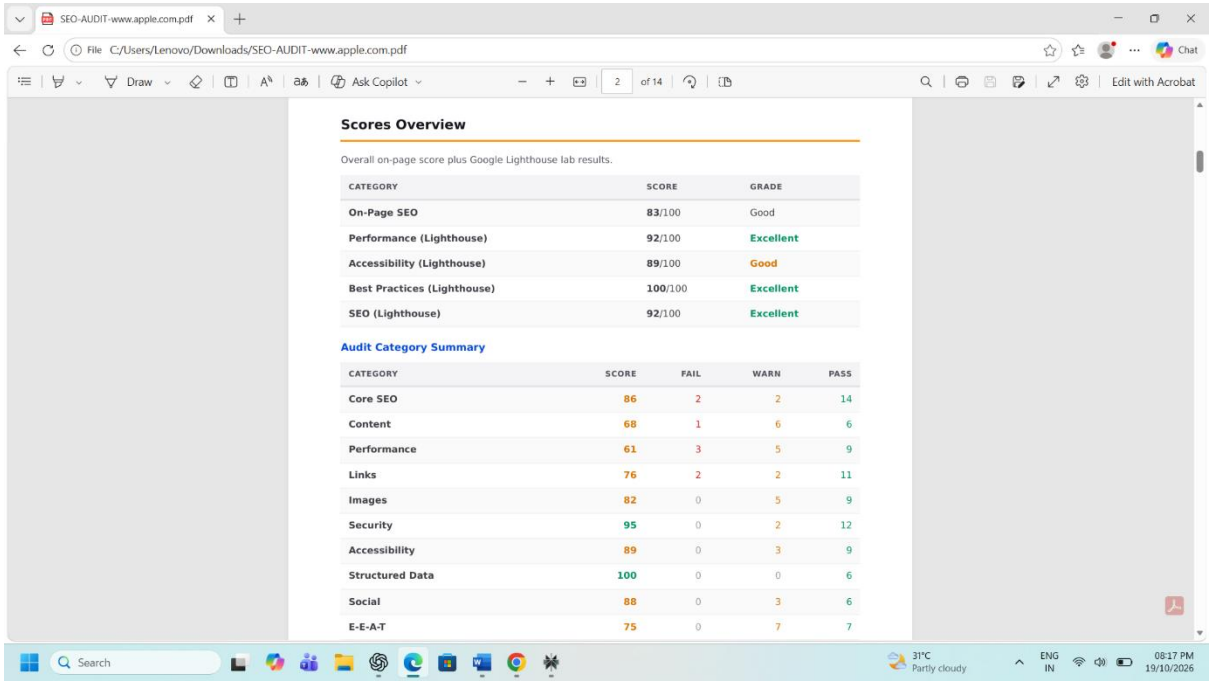

SEO Check	Result	Findings
Page Speed Score	92/100 — Excellent	The report's Lighthouse Performance score is 92/100. Its separate SEOmator Performance category score is 61/100,

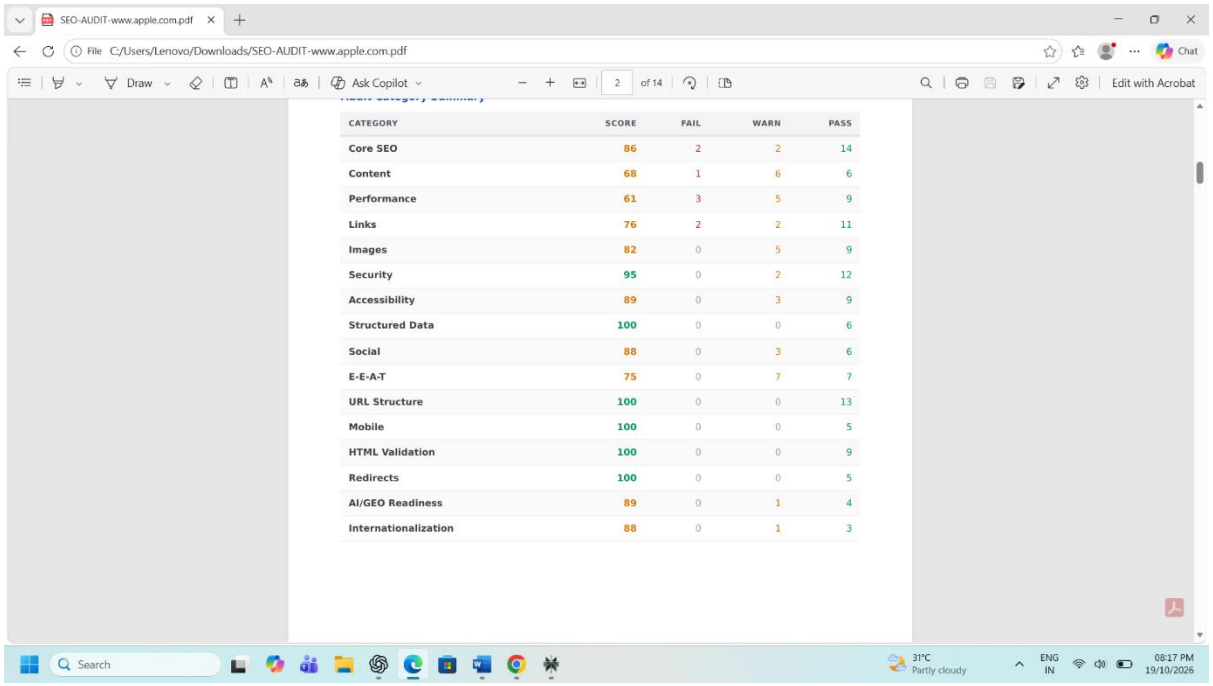

SEO Check	Result	Findings
		with issues including a large DOM, 10 external CSS files, and 423 KB of HTML. Use 92/100 for the page-speed score.
Mobile Friendliness	Yes — 100/100 in the report's Mobile category	The page passes all five mobile checks: readable font size, device-width viewport, a single viewport tag, no intrusive interstitials, and no major horizontal scrolling.
Broken Links	No invalid links reported; further verification needed	The report states "No invalid links found," but flags 3 elements referencing local file paths. It does not provide a complete site-wide check of links returning errors such as 404s, so it cannot confirm that the entire website has no broken links.
Sitemap Present	Yes	An XML sitemap is accessible at https://www.apple.com/sitemap.xml. This was checked separately because the uploaded report does not include a sitemap-presence result.
Robots.txt	Not verified — manual check required	The report does not explicitly confirm whether robots.txt is present or needs updating. A separate attempt to retrieve https://www.apple.com/robots.txt was unsuccessful, so its status cannot be confirmed from the available evidence.

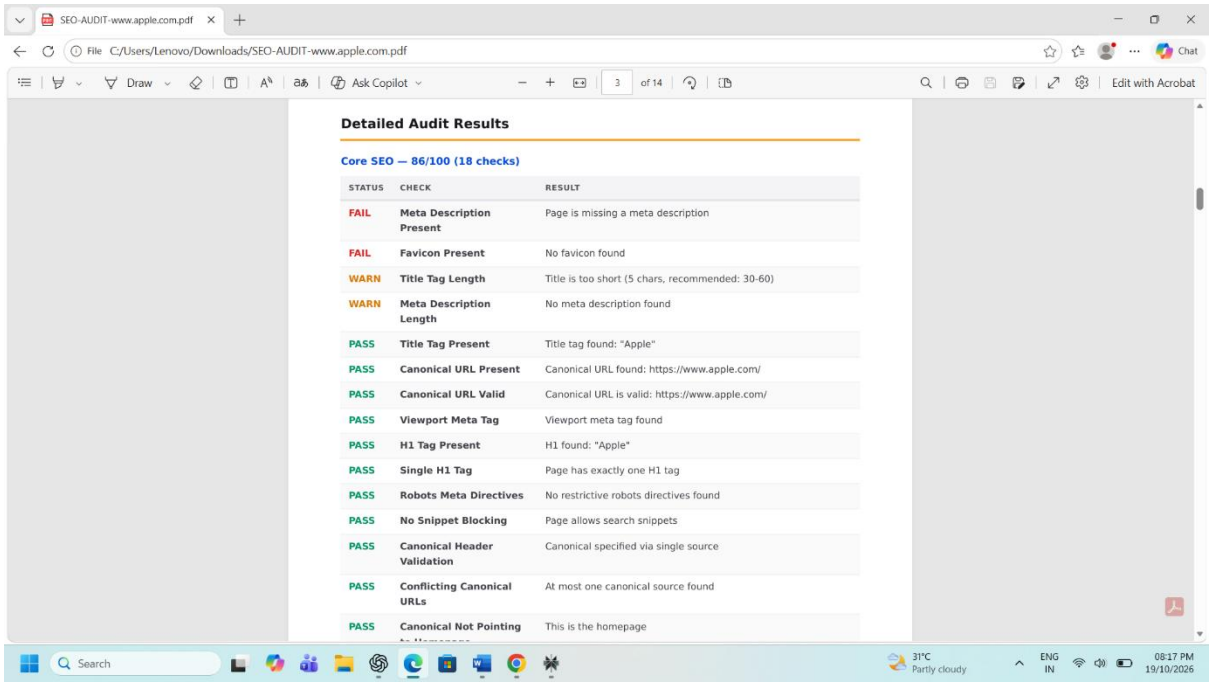

Short Conclusion

The audited Apple homepage shows excellent Lighthouse performance and passes the report's mobile checks. However, the report flags technical improvements involving page size, CSS resources, and local-file references. The XML sitemap is present; robots.txt still requires verification. These findings apply to the audited homepage, not a complete crawl of every page

on Apple's website.

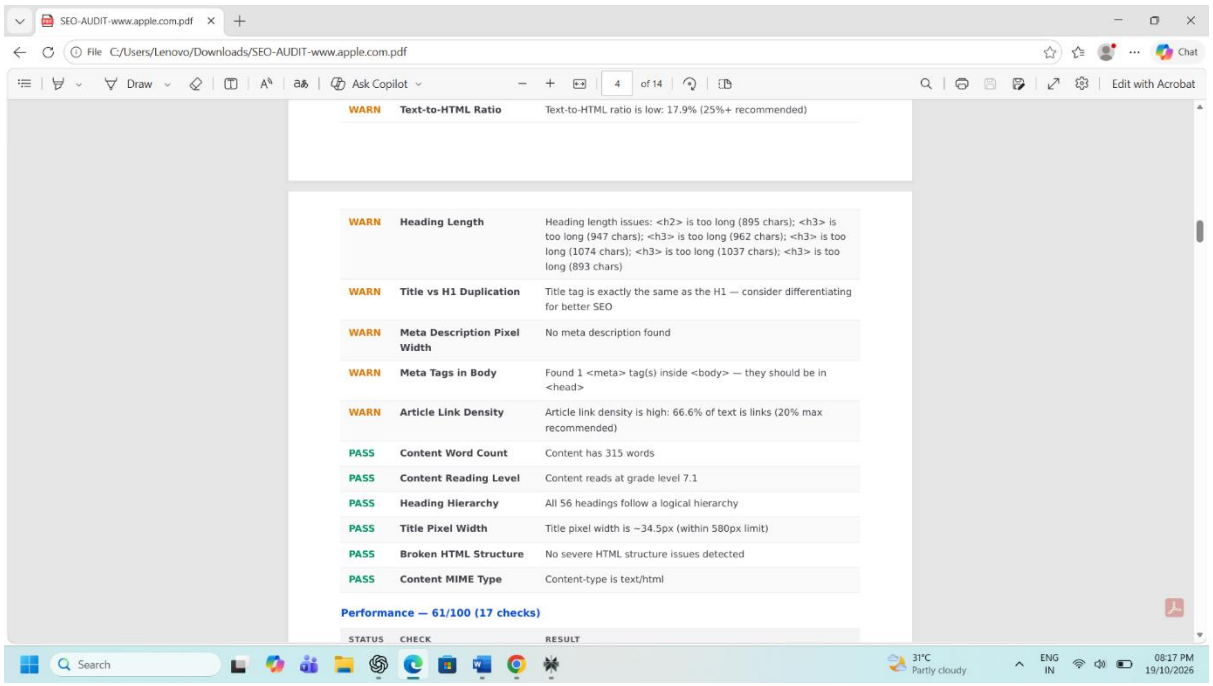

Detailed Audit Results

Core SEO — 86/100 (18 checks)

STATUS	CHECK	RESULT
FAIL	**Meta Description Present**	Page is missing a meta description
FAIL	**Favicon Present**	No favicon found
WARN	**Title Tag Length**	Title is too short (5 chars, recommended: 30-60)
WARN	**Meta Description Length**	No meta description found
PASS	**Title Tag Present**	Title tag found: "Apple"
PASS	**Canonical URL Present**	Canonical URL found: https://www.apple.com/
PASS	**Canonical URL Valid**	Canonical URL is valid: https://www.apple.com/
PASS	**Viewport Meta Tag**	Viewport meta tag found
PASS	**H1 Tag Present**	H1 found: "Apple"
PASS	**Single H1 Tag**	Page has exactly one H1 tag
PASS	**Robots Meta Directives**	No restrictive robots directives found
PASS	**No Snippet Blocking**	Page allows search snippets
PASS	**Canonical Header Validation**	Canonical specified via single source
PASS	**Conflicting Canonical URLs**	At most one canonical source found
PASS	**Canonical Not Pointing**	This is the homepage

WARN	**Text-to-HTML Ratio**	Text-to-HTML ratio is low: 17.9% (25%+ recommended)
WARN	**Heading Length**	Heading length issues: <h2> is too long (895 chars); <h3> is too long (947 chars); <h3> is too long (962 chars); <h3> is too long (1074 chars); <h3> is too long (1037 chars); <h3> is too long (893 chars)
WARN	**Title vs H1 Duplication**	Title tag is exactly the same as the H1 — consider differentiating for better SEO
WARN	**Meta Description Pixel Width**	No meta description found
WARN	**Meta Tags in Body**	Found 1 <meta> tag(s) inside <body> — they should be in <head>
WARN	**Article Link Density**	Article link density is high: 66.6% of text is links (20% max recommended)
PASS	**Content Word Count**	Content has 315 words
PASS	**Content Reading Level**	Content reads at grade level 7.1
PASS	**Heading Hierarchy**	All 56 headings follow a logical hierarchy
PASS	**Title Pixel Width**	Title pixel width is ~34.5px (within 580px limit)
PASS	**Broken HTML Structure**	No severe HTML structure issues detected
PASS	**Content MIME Type**	Content-type is text/html

Section C:

SEO Audit and Strategy for Cannoli Bakery & Café, Rajkot

Business Overview

Detail	Information
Business name	Cannoli Bakery & Café
Website	https://cannolifoods.com/
Location	Rajkot, Gujarat
Business category	Bakery, café, and gourmet store
Products and services	Cakes, pastries, brownies, croissants, desserts, customized cakes, and gifting hampers
Project objective	Improve visibility for relevant local searches and increase product enquiries and store visits

Cannoli's website lists a café on Kalawad Road and a branch near Amin Marg in Rajkot. It displays product categories, customer testimonials, opening hours, and contact information.

Scope: This is a **preliminary** audit based on the accessible homepage and public competitor pages. Findings that require a dedicated crawler, HTML inspection, or performance test are marked as unverified rather than assumed.

SEO Audit — 12 Points

No.	SEO element	Finding	Status	Suggested improvement
1	Homepage title	The retrieved page title is “Home | Cannoli - Bakery - Cafe - Gourmet Store.” It identifies the business type but does not mention Rajkot.	Needs improvement	Use a descriptive local title, such as “Bakery & Café in Rajkot | Cannoli Foods.”
2	Meta description	A standard meta description could not be verified from the retrieved content.	Not verified	Inspect the page source and add a relevant description if missing.
3	Main heading	The extracted H1 is “THE FINEST BAKERY, Cafe And gourmet Store OF THE GUJARAT.” Its wording and capitalization could be clearer.	Needs improvement	Suggested H1: “Fresh Cakes, Bakery Treats & Café in Rajkot.”

No.	SEO element	Finding	Status	Suggested improvement
4	Subheadings	Headings include “Our Product Range” and “The CANNOLI FOODS Shop Experience,” but also vague phrases such as “Bring To Magic sweet.”	Needs improvement	Use clear headings that describe the section, such as “Custom Cakes and Celebration Desserts.”
5	Product content	The homepage lists many products, including brownies, pastries, croissants, cakes, and cupcakes, but the extracted product-range section provides little detail about each.	Needs improvement	Add useful descriptions and link to relevant product or category pages where available.

No.	SEO element	Finding	Status	Suggested improvement
6	Local business information	Addresses, opening hours, a phone number, and an email address are visible. The Amin Marg branch information appears twice in the extracted content.	Mostly satisfactory	Retain clear contact details and review whether the repeated branch block is necessary.
7	Content originality and clarity	Desserts and Bulk Gifting share the same description: “The flavours you grew up with, but with a twist.” Several other phrases need editing.	Needs improvement	Write distinct descriptions for each service and proofread the homepage.
8	Customer trust content	The website displays named testimonials and claims such as “FSSAI Certified,”	Positive, with verification needed	Keep authentic testimonials and provide verifiable certification

No.	SEO element	Finding	Status	Suggested improvement
		"Premium Ingredients," and "Hygienic Kitchen." These claims were not independently verified.		details where appropriate.
9	HTTPS	The homepage was successfully retrieved through an HTTPS URL. This does not constitute a full security audit.	Basic check passed	Check for mixed content and HTTPS consistency across other pages.
10	Page speed and mobile usability	No live Lighthouse score or mobile interaction test was obtained for Cannoli.	Not verified	Run PageSpeed Insights on mobile and desktop; record the scores and test navigation on a phone.
11	Links and image accessibility	A complete broken-link check and image-alt	Not verified	Crawl internal links, inspect image alternatives,

No.	SEO element	Finding	Status	Suggested improvement
		inspection were not available from the text extraction.		and manually test key navigation and enquiry links.
12	Sitemap and robots.txt	Attempts to retrieve /sitemap.xml and /robots.txt were unsuccessful. This does not prove that the files are missing.	Not verified	Check their HTTP responses directly and locate any alternative sitemap address before recommending changes.

2. Keyword Strategy Table

Target market: Rajkot, Gujarat
Language: English
Approach: Use broad local keywords for the homepage and specific product keywords for relevant category pages.

The keywords below are proposed targets—not confirmed ranking keywords. Search volume and keyword difficulty have not been measured, so no numerical values are claimed.

No.	Proposed keyword	Search intent	Suggested target page	Priority
1	bakery in Rajkot	Find a local bakery	Homepage	High
2	bakery and cafe in Rajkot	Find a bakery/café to visit	Homepage or café page	High
3	cake shop in Rajkot	Find a cake seller	Cakes category page	High
4	custom cakes in Rajkot	Enquire about a personalized cake	Custom cakes page	High
5	birthday cakes in Rajkot	Buy a celebration cake	Birthday cakes page, if offered	High
6	brownies in Rajkot	Find a specific product	Brownies category page	Medium
7	fresh croissants in Rajkot	Find a specific product	Croissants category page	Medium
8	pastries in Rajkot	Find pastries locally	Pastries category page	Medium
9	bakery near Amin Marg Rajkot	Find a nearby store	Amin Marg location page	High

No.	Proposed keyword	Search intent	Suggested target page	Priority
10	cafe on Kalawad Road Rajkot	Find a nearby café	Kalawad Road location page	High
11	bakery gift hampers in Rajkot	Buy bakery gifts	Hampers page	Medium
12	corporate bakery gifting in Rajkot	Enquire about bulk gifting	Bulk gifting page	Medium

Cannoli's homepage supports the relevance of cakes, customized cakes, brownies, croissants, pastries, hampers, bulk gifting, and its two listed locations. Confirm specific birthday-cake options before creating a dedicated page.

Keyword Implementation Plan

- Map each keyword group to one genuinely useful page rather than creating several near-identical pages.
- Use the chosen phrase naturally in the page title, main heading, introduction, and relevant links.
- Create separate location pages only when each can provide distinct information about that branch.
- Do not advertise unverified services such as eggless cakes, same-day delivery, or midnight delivery.

3. Five Competitor URLs and Their Strengths

These are local competitors or larger businesses competing for similar Rajkot searches. Their strengths below are based on visible website features—not measured traffic, rankings, or domain-authority scores.

No.	Competitor	URL	Observed strengths	Lesson for Cannoli
1	Saraza Bakery & Café	https://www.saraza.in/bakery-and-cafe.html	Its dedicated bakery page describes celebration cakes, artisan breads, morning bakery items, and custom orders. It also includes Rajkot contact details.	Provide detailed descriptions of product ranges and explain how custom-cake enquiries work.
2	Theobroma — Rajkot	https://theobroma.in/store-locator/rajkot	It has a Rajkot-specific page with a local heading, store hours, pickup information, and an online-	Make each location's details and next action

No.	Competitor	URL	Observed strengths	Lesson for Cannoli
			order option.	easy to find.
3	Kabhi B	https://www.kabhi-b.com/	The homepage clearly positions its cake offering and online ordering. Its store locator lists multiple Rajkot outlets with addresses and telephone numbers. kabhi-b+1	Clearly communicate product positioning and maintain detailed branch information.
4	Monginis	https://cakesonline.monginis.net/	Its online storefront emphasizes cakes and pastries, doorstep	Offer clear routes to browse products, find a

			delivery, and a store-finding feature. Delivery availability must still be checked by location.	store, or enquire about ordering.
5	Bakery Bits — Rajkot	https://bakerybits.in/rajkot	Its city page includes cake prices, Rajkot delivery-area information, FAQs, and pincode-based availability checks. It describes partner fulfilment rather than implying a	Answer practical customer questions and state service availability accurately.

No.	Competitor	URL	Observed strengths	Lesson for Cannoli
			local storefront everywhere.	

4. Final SEO Recommendations

High Priority

- Improve the homepage title and H1.
  Suggested title: Bakery & Café in Rajkot | Cannoli Foods
  Suggested H1: Fresh Cakes, Bakery Treats & Café in Rajkot These address the observed lack of Rajkot in the retrieved title and the awkward main-heading wording.
- Verify and improve the meta description.
  Suggested draft: Explore Cannoli Bakery & Café in Rajkot for cakes, pastries, brownies and gift hampers. Find our Kalawad Road café and Amin Marg branch.
- Complete the missing technical checks.
  Run mobile and desktop performance tests, crawl links, inspect image alt text, and verify the sitemap and robots.txt. Record actual results before recommending technical fixes.

Medium Priority

- Develop useful product pages.
  Prioritize cakes, customized cakes, brownies, pastries, croissants, and gifting because these are already listed on the homepage. Include available options, relevant photographs, and enquiry instructions.
- Improve branch information.
  Provide clear, distinct information for the Kalawad Road café and Amin Marg branch. Review the repeated Amin Marg address block in the homepage extraction.

- Rewrite unclear and repetitive content.
  Replace phrases such as “Bring to Magic sweet” and create different descriptions for Desserts and Bulk Gifting.
- Make enquiry paths clearer.
  Use descriptive actions such as “Enquire About Custom Cakes,” “View Bakery Products,” and “Find Our Café.” Competitors demonstrate clear custom-order, store-locator, and ordering paths.

Ongoing Work

- Publish practical customer information.
  Proposed topics include cake-storage guidance, choosing a celebration cake, and selecting bakery gift hampers. Confirm product details with the business before publishing.
- Strengthen verifiable trust information.
  Support certification claims with appropriate details and retain authentic customer feedback. The homepage already contains testimonials and quality claims that can be reviewed and clarified.
- Measure results after implementation.
  Track relevant search visibility, visits to product and location pages, and customer enquiries. Report changes over time rather than promising specific rankings.

Conclusion

Cannoli has a useful starting point: a broad product range, visible contact details, customer testimonials, and two listed Rajkot locations. Its clearest observed opportunities are more descriptive local page titles, clearer headings, stronger product information, and less repetitive copy. Technical issues should be confirmed through testing before being presented as established faults.
